

Document

Concepts

Document

Documents are used to present information from Blueriq in an downloadable (pdf) file.

Content item

A content item is used to create structure in [text items](#) and other [content items](#).

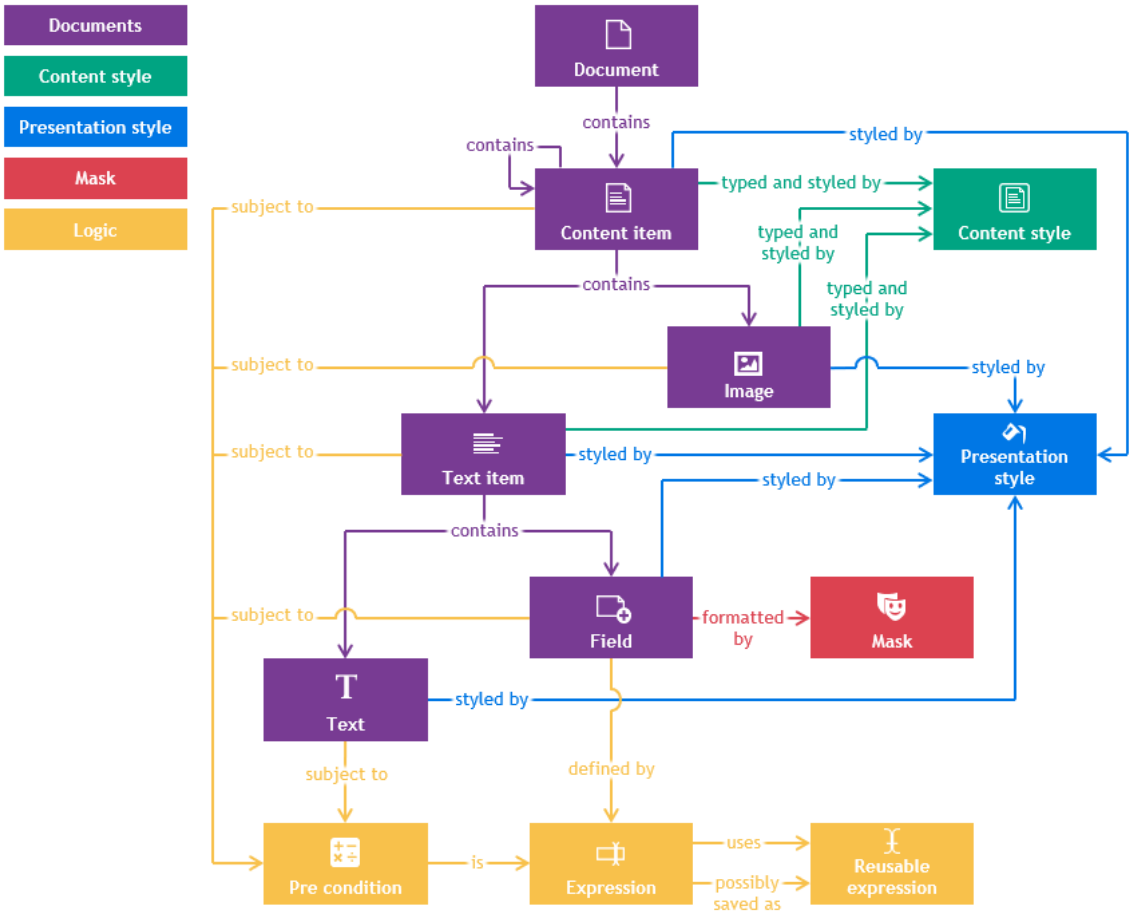

Text item

A text items is used for displaying text in a [document](#), or on a [page](#).

Design guide

For the design guide on how to model documents see [Documents guide](#)

Visuals

This visual does not aim to be complete, but rather to provide insight.
