

Third-party libraries

Several fantastic pieces of free and open-source software have really helped get Blueriq to where it is today. A few require that we include their license agreements in our documentation (or within our product). Consider it done. As we enjoy giving credit where it's due, we included the entire list below. This means you can not only see which software we've been using, but the terms of the licenses too. A big thanks from all of us at Blueriq to the smart people behind the fantastic programs listed.
