

Key-Value Redis Store Component

This functionality is only available with the **High Availability License**. Please contact Blueriq Support.

The file `application-keyvalue-redis-store.properties` has to be available and should be configured.

```
spring.data.redis.host=  
spring.data.redis.password=  
spring.data.redis.port=
```

To configure the Blueriq Runtime to run in a cluster environment, please read the [Runtime cluster](#) guide.
