

The Blueriq Community is publicly available

The Blueriq Community is now open to the public. This means that you no longer need to log in when viewing the documentation or knowledge base of the Blueriq Community. With this transition, the Community becomes a space where both beginners and experts can explore the possibilities of the Blueriq Platform without limitations.

Not all documentation is publicly available, as it may contain information regarding, for example, security risks or personal information. A login is still required to access these parts. In addition, *Questions* can now only be asked in the *Customer Portal*, so you can easily ask your questions in a secure and separate environment.

If you have any questions regarding this change, please contact us at support@blueriq.com.

Regards,

Maarten
